#### **DETAILED ACTION**

### **Double Patenting**

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 12-83, 84-87 and 96-97are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 of U.S. Patent No. 6,728,475 Although the conflicting claims are not identical, they are not patentably distinct from each other because the difference between claims 12-83 of the present application and claims 1-14 of U.S. Patent No. 6,728,475 is that claims 1-14 of U.S. Patent No. 6,728,475 is that claims 1-14 of U.S. Patent No. 6,728,475 further recite that the reproduced picture is displayed. However, it is noted that eliminating an element and its function is obvious to one of ordinary skill in the art. Therefore, it would have been obvious to one of ordinary to modify claims 1-14 of U.S. Patent No. 6,728,475 by eliminating any element used for displaying the reproduced picture from claims 1-14 of U.S. Patent No. 6,728,475 to produce claims 12-83 of the present application.

Application/Control Number: 10/805,275 Page 3

Art Unit: 2616

Applicants argues that claims 12-87 and 96-97 of the present application is distinct from claims 1-14 of U.S. Patent No. 6,728,475 because claims 1-14 of U.S. Patent No. 6,728,475 recite a picture is repeatedly output for displaying and claims 12-87 and 96-97 of the present application recite maintaining a displayed frame. In response it is noted that the recitation of maintaining a displayed frame in claims 12-87 and 96-97 of the present application inherently contains "repeatedly output a frame" as being recited in claims 1-14 of U.S. Patent No. 6,728,475. In order to maintain displaying a frame, the frame must be repeatedly output for the time of display.

3. Claims 98-102 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 20-25 of copending Application No. 11/090034. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 98-102 of the present application recites an method that corresponds to the apparatus of claims 20-25 of copending Application No. 11/090034. It would have been obvious to one of ordinary skill in the art to use the apparatus of claims 20 –25 of copending Application No. 11/090034 to perform the method of claims 98-102 of the present application

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

## Allowable Subject Matter

Art Unit: 2616

4. Claims 88-95 and 103-119 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion
